“Change has a considerable psychological impact on the human mind. To the fearful it is threatening because it means that things *may* get worse. To the hopeful it is encouraging because things *may* get better. To the confident it is inspiring because the challenge exists to make things better.” ~ King Whitney, Jr.

When we look at change, there are as many different views as there are members of our Club. However, one thing is for certain...change is inevitable. With each one of those different definitions comes a different expectation. Some of those expectations demand that change takes place immediately while others accept it as it comes...as a process of nature.

The past few months, we have seen some new and exciting changes happen at our Club. We have a new color scheme working its way in to the building, we have a new Board of Directors, and we have new challenges and situations ahead of us to face. However, some times change take time.

Whether we are a “change now” or a “gradual changer”, we have to remember that change is a must if we are to continue in a forward movement and with so many different ideas on change, we will have to take our time to make some of those ideas a reality.

Without change we would not have progress. Without progress we would not have Club such as the one that we have today. We need not measure the quantity of change but instead the quality.

So all of us—everyone of us as members of the Fond du Lac Yacht Club—have a challenging road ahead of us. We need to embrace the changes we have and undertake the new and exciting road because only through the acceptance of those changes will the true challenges be experienced.

Our only real measure of our success is the future. Where do you want to see it?
